

for wires from 4.0 - 15.0 mm insulation diameter

The AKM-420 Machine strips wires with diameters from 4.0 - 15.0 mm (6.0 - 70 mm²) and conventional insulation material.

Easy handling and exact centralized positioning of the wire result in a precise and clean strip.

The machine comes with a set of 6 guide tubes and three stripping blade sets.

After wire positioning the stripping cycle is started with the foot pedal.

This machine is the optimum solution for any ordinary stripping process.

Basic Equipment

The machine is equipped with following accessory

- Installed safety guard
- Pneumatic foot pedal
- Three stripping blade sets
- 6 guide tubes
- Air hoses
- Tool kit

AKM-420
Pneumatic Stripping
Machine
PN 0-1481002-1

Features

- Easy handling
- Exact centralized stripping position of the wire
- Precise and clean stripping result
- Simple blade changeover

Compatible Wire Types

- Single conductor wires
- Multi conductor wires

Technical Data

Wire Size Range
6.0 - 70 mm²

Stripping Length
Max. 170 mm

Pneumatic Connection
600 kPa (6 bar)

Dimensions [mm]
WxHxD = 240x200x510

Weight
20.5 kg

Noise Pressure Level
70 dB(A)
